### **Election/Restrictions**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13, 23-35, and 45-49 drawn to updating content description using a single command, classified in class 715, subclass 255; and
  - II. Claims 14-22, 36-44, and 50-56 drawn to using navigation path to update with multiple payload values, classified in class 715, subclass 738.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as *applying an update command to a set of nodes*; and invention II has separate utility such as *calculating a navigation path that selects a set of nodes* . See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification,

restriction for examination purposes as indicated is proper. Furthermore, because the searches required for each individual group is not required for the other groups, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
